

Chapter 2: - Biological Classification

SAT 2

- ① What kind of genetic material found in Viroids?
- ② Why are fungi called Saprophytes?
- ③ What is phycobiont and mycobiont?
- ④ What are mycoplasma?
- ⑤ Why Deuteromycetes are called 'imperfect fungi'?
- ⑥ Why Coronavirus (COVID-19) is called Pandemic?
- ⑦ Who proposed five kingdom classification?
What are these kingdoms?
- ⑧ Differentiate between Plasmogamy and Karyogamy.
- ⑨ Comment on "viruses are biologist's puzzle."
- ⑩ Find out what do the terms 'algal bloom' and 'red tides' signify.
- ⑪ What are the characteristic features of Euglenoid?
- ⑫ What are halophiles, thermoacidophiles?
- ⑬ What is 'algal blooms' and 'red tides'?
- ⑭ What are the major groups of Protozoans?
- ⑮ How lichens are good natural indicator of pollutants?
- ⑯ As a biology student write your view how to eradicate and aware about 'COVID-19'.
